SECURITY...

Experience a new way of living with the patent-pending StayD feature offered in the MG5000 and MG5050 wireless security systems. The revolutionary StayD feature represents a completely reversed philosophy that resolves all issues with any security system made today. A StayD system is always armed and only partly disarmed when entering or exiting a site, which is the opposite of a common security system that's always disarmed and needs to be armed to provide protection. Go with simpler and safer living.

STAY D™

Away from home:

When you leave your home, maximize your security with a push of a button. Each of up to 32 points of detection, like your front door, windows, balcony and motion detection devices, will immediately alert you in the case of an unrecognized breach. This invisible barrier not only provides you with complete security, but with the peace of mind that your family, your home and your belongings are safe.

Security while you sleep:

Now your main floor can be completely protected while you sleep in full security upstairs. Your front and back doors, windows, balconies and any other points of detection that you choose can be on full alert while your family is free to roam the upper level of your home without setting off an alarm. When you're ready to come downstairs, remove the arming mode with a touch of a button.

Home alone:

Give yourself peace of mind knowing that you are safe, even when you are home alone. Whether you're upstairs relaxing in a bath or downstairs playing with the children, you can't always hear what's happening on the main floor. With Magellan you can secure your perimeter points of detection and keep your living space unarmed.

MADE SIMPLE.

Twice the security:

Magellan can secure two separate areas with one single system. This means your home can be disarmed while your garage is armed 24hrs a day. Secure your shed, your trailer or an upper apartment unit to double up on your security. Ensure that your pool, your home office, your safe room or your wine cellar can only be accessed by you or someone you choose or that an area automatically arms at the same time every day.

Check your security status with your remote:

With one-touch, remote control convenience, managing your security system has never been simpler. Disarm your system with one button, arm it with another or send a panic signal to your monitoring station. For those times when you get into your car and just can't remember if you armed your system, simply push the info button  on your remote: if the light is red, your system is armed, if it's green, your system is disarmed. Your system status can also be communicated by an audible tone.

Wireless Communications

Go cellular. Your system can send you a text message (SMS) or a pre-recorded voice message on up to 5 telephone numbers to notify you of system events, such as arming/disarming, alarms and troubles. You can also remotely control your system (e.g. arm/disarm) from any phone by sending a text message (SMS) or by using a voice-guided menu.

Internet Access

Go high-tech and receive notifications by e-mail. For example, get a message as soon as your kids get home from school. Also, arm/disarm and monitor your security system through a web browser from anywhere in the world.

Wireless security:

With Magellan you can provide your home with maximum security without the hassle of tearing holes in your wall, running wires or paying for expensive installations. The convenience of a wireless security system also means your system can always move with you, so you can secure your apartment or condo even if you plan on buying something else later.

Avoiding false alarms:

Most false alarms result from errors that occur from security system owners using over-complicated keypads. The keypads that accompany your Magellan system have been designed with this major obstacle in mind, and as a result, provide you with guidance and one-touch button ease of use.

Overview:

- Secure up to 32 points of detection
- Control your security system with remote control convenience and one-touch button ease
- Protect two separate areas with one single system
- A full range of wireless transmitters, including remote controls, motion detectors, door contacts and smoke detectors are available
- MG5000 : 2 on-board zones and 2 on-board PGMs
MG5050 : 5 on-board zones and 4 on-board PGMs
- Multipath Communication: Monitor your system's status, receive notification of system events, control your system (arm/disarm, open a garage door, etc.) and report system events to the monitoring station using one or more of the following communication methods.
 - Internet and email (optional IP100)
 - GPRS, GSM, and SMS text messages (optional PCS Series Module)
 - Voice (optional VDMP3)
 - Landline telephone
